MULTIPURPOSE PORTABLE FUMICATOR

Multipur offers complete solution for the disinfection of virtually any premises and ensures the guaranteed kill of harmful micro organisms as the minutes droplets of disinfecting agent produced the multipur way remain suspended in the aerosol form in the air for hours and are of the same order in size as the micro organisms are.

CONICA MULTIPUR IS MUCH MORE THAN A DISINFECTOR.

- It very effectively fumigates with insecticides to keep homes, offices or any premises insect free. It maintains proper climate by humidifying the atmosphere, using plain water.
- Add just a drop or to of perfume/deodorant to water and spray with Multipur to make the atmosphere pleasant.
- It generates mist etc. for special effects.

SIMPLE AND ECONOMIC IN OPERATION:

So easy to use, Conica Multipur can be efficiently operated even by a ward boy. In addition no heat or catalyst is needed to spray the aerosol mist. So no extra expenses are incurred. And no separated arrangement is required for humidity. Idea Temperature in the area to be disinfected should be between 24°C to 38°C.

CONCENTRATION:

- For Routine Disinfection: 30ml of formalin of 40% concentration with 90ml. of pure water is 1000 cubic feet area.
- For Intensive Disinfection: 90ml. of formalin 40% concentration with 90ml. of Pure water is sufficient for 1000 cubic feet area.

FORMALIN, DETTOL, SAVLON, SERVOCID, PHENOL ETC. CAN BE SAFELY USED THE MULTIPUR WAY.
